EXECUTIVE SUMMARY

INTRODUCTION

The Northwest Arkansas Regional Planning Commission (NWARPC) System Wide Origin and Destination Survey was conducted in March 2018. The survey was completed for regional transit riders in the Northwest Arkansas area on both Ozark Regional Transit (ORT) and Razorback Transit (Razorback) systems.

This report will provide an overview and detailed description of the Survey process. The report covers the purpose/background, the Survey design, sampling, and administration methodology. The report will also cover the quality control process before, during, and after the Survey.

Purpose of the Survey

The Survey served several objectives, including:

- The compilation of statistically accurate information about transit customers' use of transit services for planning purposes.
- Enhancing the NWARPC four-step travel demand forecasting model.
- Providing the understanding of differences in trip characteristics and ridership profiles from previous survey efforts.
- Assisting regional transit agencies in meeting Title VI Civil Rights Requirements and enhance Title VI programs.

BACKGROUND

Date/Time of the 2018 O&D Study

The Survey collection was administered the first two weeks of March 2018 and avoided all school breaks and holidays.

Data Needed to Fulfill Work

Fully understanding the data needs for the Survey, ETC Institute (ETC) worked with NWARPC, ORT, and Razorback to acquire the specific data requirements throughout the project phase. The data requirements that were fulfilled are as follows:

- Ridership data – APC counts at the stop level and ridership accumulated at the route / direction / time of day cell level, or fare box data if APC not available for routes (Razorback)
 - o 2017 ridership to prepare for the collection
 - o 2018 spring ridership, coinciding with the data collection, for the expansion
- Schedule data – Bus trip information synonymous with driver / runcut shifts
- GIS data – GTFS or Shape files / bus stop lists

- Operational procedures – boarding procedures, command center potential locations, passes for interviewers, system ridership characteristics, dates not appropriate for surveying, passenger outreach, difficult to reach populations, etc.

SURVEY DESIGN AND ADMINISTRATION

Full Survey Summary and Key Findings

ETC conducted the Survey collection between March 5 and March 14, 2018. The magnitude of the Survey will allow NWARPC planners to better understand the needs and travel patterns of many specialized populations.

Some important findings from the analysis of the regions' riders are the following (Using Linked Weight Factor):

- Walking is the dominant access (83%) and egress (88%) mode for all riders.
- Ninety-two percent (92%) of riders use only one route to complete their one-way trip.
- Seventy-nine percent (79%) of all riders are between the age of 19 to 34.
- Twenty-four percent (24%) of riders reported not having a household vehicle with the majority (71%) of zero household vehicles coming from the ORT system.
- More than half (56%) of riders reported being employed (full & part-time).
- Eighty percent (80%) of riders possess a valid driver's license.

Sampling Plan Summary

To ensure that the distribution of completed surveys mirrored the actual distribution of riders, ETC developed a sampling plan to collect passenger origin and destination survey data with approximately 1,000 of the system's riders during the weekdays based on February 6 and 8, 2018 ridership. The Table below shows the overall Sampling Plan Rates, Goals, Records Completed, and Percentage of Goal Obtained.

System	SAMPLING RATE	GOAL	COMPLETED	% COLLECTED
Ozark Regional Transit	8% of Daily Ridership	103	132	128%
Razorback Transit	8% of Daily Ridership	887	976	110%
Totals	8% of Daily Ridership	990	1,108	112%

Survey Weighting and Expansion Summary

Weighting and expansion is used to make the sample collected representative of the population ridership. Based on the low ridership volumes for ORT routes and the route/trip type of Razorback, the expansion was simply expanding the surveys at the route and time of day level.

Data Quality Assurance and Processing Summary

Overall quality assurance/quality control (QA/QC) process was implemented throughout the actual Survey administration and after its completion with proven post-processing quality check techniques. The establishment of specific sampling goals and procedures for managing the goals ensured that a representative sample was obtained from each route. Also, the use of the latest geocoding/survey review tools used by ETC's Transit Review Team contributed to the high-quality results that were achieved.

Areas of improvement for future on-board surveys

Leading into the data collection discussions were held as to how to best capture the high percentage of known short trips occurring on Razorback. It was determined that bringing in experienced interviewers to collect the data, rather than local staff. Using this plan, the collection occurred without any meaningful issues. No changes were identified during the project; and, therefore, no improvements are necessary based on current technology and methodology.

CHAPTER 1: SURVEY METHODOLOGY

SAMPLING PLAN

To ensure that the distribution of completed surveys mirrored the actual distribution of riders, ETC developed a sampling plan that ensured the completion of at least 1,000 surveys during the weekdays, based on the provided ridership. The time periods for the survey collection of this survey were as follows:

TIME PERIOD	TIME RANGE
AM PEAK	6:00am- 9:00am
MIDDAY	9:01am-2:59pm
PM PEAK	3:00pm-6:00pm
EVENING	6:01pm-9:00pm

Sources of Ridership Data

The source of the original ridership used to plan for the survey came from ORT, February 6 and 8, 2018, and the full month of February 2018 for Razorback. ETC used this ridership to create the sampling plan.

Sampling Goals for O&D Survey

ETC developed a sampling plan that would ensure the completion of the Survey with 990 riders, or 8%, of the system's weekday riders. The sample plan was designed to capture a total of 887 surveys for Razorback and 103 surveys for ORT. ETC collected a total of 976 surveys on Razorback and 132 surveys on ORT.

Table 1-1 on the following page shows the goals and the actual number of completed surveys that were obtained by Route, Time Period, and Direction. The sampling plan for the survey was designed to obtain completed surveys using the same sample rate for each of the bus routes operated by ORT and Razorback.

TABLE 1-1: SAMPLING GOALS AND SURVEYS COMPLETED BY TIME OF DAY AND DIRECTION

System			Ridership						Sampling Goals						COMPLETED					
			AM					Total	AM					Total	AM					Total
			Peak (6:00am- 9:00am)	Midday (9:01am- 2:59pm)	PM Peak (3:00- 6:00pm)	Evening (6:01pm- 9:00pm)			Peak (6:00am- 9:00am)	Midday (9:01am- 2:59pm)	PM Peak (3:00- 6:00pm)	Evening (6:01pm- 9:00pm)			Peak (6:00am- 9:00am)	Midday (9:01am- 2:59pm)	PM Peak (3:00- 6:00pm)	Evening (6:01pm- 9:00pm)

SURVEY INSTRUMENT

The tablet PCs were the preferred survey method as the tablet PC's have an on-screen mapping features that allows for real-time geocoding of addresses and places based off either address, intersection or place searches based on feedback from respondents. The respondents can then confirm the geocoded location based on the on-screen map that shows the searched address/location via a Google Map indicator icon. In addition to using the mapping feature to collect the GPS coordinates of major survey locations (home address, origin address, destination address, boarding location, and alighting location), the tablet PC also allows the surveyor to walk through each question with the respondent. This allows the surveyor to answer any questions as well as to ensure the quality of the data collected. The respondent can also press the answers to the questions directly on the tablet PC during the demographic section to allow for more privacy. Examples from the tablet PC survey are below and on the following page.

FIGURE 1-1: TABLET PC SCREENSHOT FOR QUESTION: "WHAT TYPE OF PLACE ARE YOU COMING FROM NOW (THE STARTING PLACE FOR YOUR ONE-WAY TRIP?)"

The screenshot displays a tablet screen with a web browser interface for the 'NW ARKANSAS OB 2018 Travel Survey'. The main heading is 'ORIGIN_PLACE_TYPE' in green. Below it, the question is: 'ORIGIN_PLACE_TYPE What type of place are you COMING FROM NOW? (the starting place for your one-way trip)'. The interface features a grid of 12 light blue buttons with white text, arranged in two columns. The buttons are: 'Your usual WORKPLACE', 'Work related', 'Your HOME / HOTEL', 'University of Arkansas (students only)', 'Other College / University (students only)', 'Recreation / Sightseeing', 'Shopping', 'School (K-12) (students only)', 'Airport (passengers only)', 'Medical / Doctor / Clinic (non-work)', 'Restaurant', 'Social Visit / Church', 'Personal business', and 'Other:'. Below the grid is a text input field for the 'Other' category. At the bottom of the screen, there are four navigation buttons: 'Exit and clear survey' (red), 'Previous' (orange), 'Callback' (blue), and 'Next' (green). A small text note at the bottom left reads 'THIS ROUTE: Ozark Rt 3: Park Apts to Mall'. A copyright notice '© ETC Institute 2018' is visible at the bottom right of the survey area.

ORIGIN_PLACE_TYPE	
ORIGIN_PLACE_TYPE What type of place are you COMING FROM NOW? (the starting place for your one-way trip)	
Your usual WORKPLACE	School (K-12) (students only)
Work related	Airport (passengers only)
Your HOME / HOTEL	Medical / Doctor / Clinic (non-work)
University of Arkansas (students only)	Restaurant

FIGURE 1-2: TABLET PC SCREENSHOT FOR QUESTION: “WHAT IS YOUR HOME ADDRESS (OR NEAREST INTERSECTION)?”

The screenshot shows a tablet PC interface for the "NW ARKANSAS OB 2018 Travel Survey". The question is "HOME_ADDRESS" and asks for the user's home address or nearest intersection. The form includes fields for Street Address, City, State, Zip Code, Latitude, and Longitude. Below these fields is a map of Northwest Arkansas with a red pin indicating the location. The map is labeled "Ozark Rt 3: Park Apts to Mail". At the bottom of the screen are four buttons: "Exit and clear survey", "Previous", "Callback", and "Next".

FIGURE 1-3: TABLET PC SCREENSHOT FOR QUESTION: “WHERE DID YOU GET ON [BUS ROUTE/DIRECTION] FOR THIS ONE-WAY TRIP?”

The screenshot shows a tablet PC interface for the "NW ARKANSAS OB 2018 Travel Survey". The question is "BOARD_SURVEY_ROUTE_BUS" and asks where the user got on the bus for a one-way trip. The form includes fields for Street Address, Latitude, and Longitude. Below these fields is a map of Northwest Arkansas with a blue line indicating the bus route. The map is labeled "Ozark Rt 3: Park Apts to Mail". At the bottom of the screen are four buttons: "Exit and clear survey", "Previous", "Callback", and "Next".

Exit and clear survey Previous Suspend Callback Next

While the tablet-based interview was the primary medium used for data collection, other mediums were also utilized to make the best use of project resources. For local bus riders who didn't have sufficient time to complete the interview, a phone option was available (further described in data collection task). This option was not needed because experienced interviewers were deployed and there were relatively few transfers which increases the length of the interview. When needed, the interviewer alighted the vehicle to complete the interview.

For non-English speaking ridership, an option was available if a non-bilingual interviewer was not on the vehicle that described the purpose of the survey in their native language and allowed a name and phone number to be provided so a callback attempt could be made in that language which came out to less than one percent.

SURVEY ADMINISTRATION

Labor Recruitment and Training

For the Survey, ETC utilized three survey staff which have worked on multiple similar studies in the past. The survey staff were instructed to understand that while they are not NWARPC, ORT, or Razorback employees, they were representing all of three of the agencies while on transit vehicles or property and they needed to act in a manner that reflected positively.

Maximizing participation and legitimizing the survey among passengers depended on the public response to the survey staff. To support a good public image, ETC imposed dress code standards that required survey staff to wear clean appropriate clothing to present a casual, yet neat, appearance that ensured professionalism and comfort. Survey staff were provided with surveyor badges and vests, identifying surveyors to the ORT and Razorback staff and passengers to further legitimize their appearance. The badge and dress code standards promoted a professional appearance and reinforced survey legitimacy, which increased passengers' trust in the interviewers and the process.

As survey staff are one of the key ingredients to the success of a project, ETC provided an in-depth project specific training prior to data collection to ensure a successful data collection.

Organization of Survey Team

Survey Administrators Roles

For the Survey, interviewers boarded their assigned bus and selected riders at random to participate in the survey. While conducting the interview, interviewers asked the respondent each question from the survey tablet and recorded each response provided to them by the passenger. Interviewers needed to establish conversation regarding the Survey with bus passengers and capturing passenger responses.

Survey Administration

For the Survey, a random number generator was used to determine which passengers were asked to participate in the survey after boarding the surveying bus, shown in Figure 1-5. If four people boarded a bus, the tablet PC randomly generated a number from 1 to 4. If the answer was 2, the second person who boarded the bus was asked to participate in the survey. If the answer was 1, the first person was asked to participate in the survey, and so forth. The selection was limited to the first six people who boarded a bus at any given stop to ensure the interviewer could keep track of the passengers as they boarded. For example, if 20 people boarded a bus, the tablet PC program would randomly pick one of the first six people for the survey. If the interview is refused by the randomly selected rider, then the rider who boarded before the rider selected would be attempted.

FIGURE 1-5: SURVEY RANDOM NUMBER GENERATOR

Survey Procedure

All routes were surveyed using the tablet PCs. Interviewers selected people for the Survey in accordance with the sampling procedures described earlier in this sub-section. Once an interviewer had selected a person for the survey, the interviewer:

- Approached the person who was selected and asked him or her to participate in the survey.
- If the person refused, the interviewer ended the survey.
- If the person agreed to participate, the interviewer asked the respondent if he/she had at least 5 minutes to complete the survey.
- If the person did not have at least 5 minutes on the bus, the interviewer asked the person to provide name and phone number first and then proceeded to complete the interview. Most riders were able to complete the interview. For those who were not, a phone interviewer from ETC's call center contacted the respondent and completed the remainder of the survey. This methodology ensured that people who completed "short-trips" on public transit were well represented.
- If the person had at least 5 minutes on the bus, the interviewer began administering the survey to the respondent as a face-to-face interview using a tablet PC.

Data Quality Assurance and Processing

Many of the processes described in previous sections of this report were essential elements of the overall quality assurance/quality control (QA/QC) process implemented throughout the Survey administration. The establishment of specific sampling goals and procedures for managing the goals ensured that a representative sample was obtained from each route. Training of interviewers and the high levels of oversight provided by field supervisors ensured that the Survey was administered properly. Also, the use of ETC's Tablet PC survey with an embedded google map search, ETC data review program, and Caliper® Maptitude GIS Software all contributed to the high quality of geocoding accuracy that was achieved.

The following sub-sections describe the QA/QC processes that were implemented after the data was collected:

Process for Identifying Complete Records

To classify a survey as being completed, the record must have contained all elements of the one-way trip. ETC has classified required trip data as containing the complete answers to the following:

- Route/Direction
- Time of trip
- Transfers made
- Home address
- Origin address
- Destination address
- Origin type place
- Destination type place
- Access mode
- Egress mode
- Boarding location
- Alighting location

In addition to the required trip data questions, a survey must be marked as complete by the online survey program which occurs only if the interviewer has navigated through every required question on the online survey instrument including demographic questions.

Online Visual Review Tool

ETC created an online visual review tool that allows for the review of all completed records within the database. This tool shows all components of each individual trip as well as a series of preprogrammed distance and ratio checks as described on subsequent pages. After directions were finalized, the next step was to run each record through the Speed/Distance/Time checks. Figure 1-6 shows an example of the online visual review tool.

FIGURE 1-6: ONLINE VISUAL REVIEW TOOL (EDITABLE VERSION)

Pre-Processing Distance Checks

A series of distance and ratio checks are preprogrammed into the online visual review tool to allow for ETC's Transit Review Team (TRT) to take a more systematic approach in reviewing complete records. The TRT process for editing surveys is described later in this section. *Note: The distance and ratio checks described were meant to alert the reviewer that closer evaluation was needed. It did not necessarily indicate that the record was inaccurate or unusable.*

The distances used for the checks were created using the great-circle distance formula which is based on a straight line from point A to point B that considers the curvature of the earth.

Access/Egress Mode Distance Check

Table 1-2 below shows the distance checks for access (Origin to Boarding) and egress modes (Alighting to Destination).

TABLE 1-2: ORIGIN TO BOARDING AND ALIGHTING TO DESTINATION DISTANCE CHECKS

Distance Check Name	Check	Condition 1	Condition 2	Flag?
Origin to Boarding	Origin to Boarding distance is greater	Access Mode - ANY USE OF A VEHICLE (i.e., dropped off, rode with others, drove, taxi...)		No

	than 1.75 linear miles	Access Mode - Walk/Wheelchair/Skateboard	There is at least one transfer from origin to boarding	No
		Access Mode - Walk/Wheelchair/Skateboard	There are no transfers from origin to boarding	Yes
	Origin to Boarding distance is less than .25 linear miles	Access Mode - ANY USE OF A VEHICLE (i.e., dropped off, rode with others, drove, taxi...)		Yes
		Access Mode - Every mode	There is at least one transfer from origin to boarding	Yes
		Access Mode - Walk/Wheelchair/Skateboard	There are no transfers from origin to boarding	No
Alighting to Destination	Alighting to Destination distance is greater than 1.75 linear miles	Egress Mode - ANY USE OF A VEHICLE (i.e., will get picked up, ride with others, drive, taxi...)		No
		Egress Mode - Walk/Wheelchair/Skateboard	There is at least one transfer from alighting to destination	No
		Egress Mode - Walk/Wheelchair/Skateboard	There are no transfers from alighting to destination	Yes
	Alighting to Destination distance is less than .25 linear miles	Egress Mode - ANY USE OF A VEHICLE (i.e., will get picked up, ride with others, drive, taxi...)		Yes
		Egress Mode - Every mode	There is at least one transfer from alighting to destination	Yes
		Egress Mode - Walk/Wheelchair/Skateboard	There are no transfers from alighting to destination	No

Origin to Destination Distance Check

Table 1-3 shows the distance checks based on the origin and destination locations.

TABLE 1-3: ORIGIN TO DESTINATION DISTANCE CHECKS

Distance Check Name	Check	Flag?
Origin to Destination	Origin equals the Destination	Yes
	Origin to Destination is greater than 50 miles	Yes
	Origin to Destination is less than .25 miles	Yes

Boarding and Alighting Distance Check

Table 1-4 on the following page, shows the distance checks based on the boarding and alighting locations.

TABLE 1-4: BOARDING TO ALIGHTING DISTANCE CHECKS

Distance Check Name	Check	Flag?
Boarding to Alighting	Boarding equals the Alighting	Yes
	Boarding to Alighting is less than .25 miles	Yes

Pre-Processing Ratio Checks

After all transfer checks were completed, the next step in this process involved the application of a series of QA/QC Ratio Checks.

Three Ratio Checks were conducted for each record. First, the distance between boarding and alighting was divided by the distance between origin and destination. If the rider had a high ratio, then the rider was on the bus for an extensive time compared to the origin to destination distance. If the check created an extremely low ratio, the use of transit seemed unnecessary.

Second, the distance between origin and boarding was divided by the distance between origin and destination. If the rider had a high ratio, the origin to boarding distance was excessive compared to the origin to destination.

Third, the distance between alighting and destination was divided by the distance between origin and destination. If the rider had a high ratio, the alighting to destination distance was excessive compared to the origin to destination. Table 1-5 describes in more detail the ratio checks used, and the conditions in which a record would be flagged.

TABLE 1-5: RATIO CHECKS

Ratio Checks	Check	Result of Formula	Condition 1	Condition 2	Flag?
Boarding to Alighting distance divided by Origin to Destination distance	Boarding to Alighting Distance/Origin to Destination Distance	the result of this formula is 1.5 or greater			Yes
	Boarding to Alighting Distance/Origin to Destination Distance	the result of this formula is less than .3	Access and Egress modes are both Walk/Wheelchair/Skateboard	There are NO transfers involved in the trip	Yes
	Boarding to Alighting Distance/Origin to Destination Distance	the result of this formula is less than .3	Access or Egress mode - <u>ANY USE OF A VEHICLE</u>		No
	Boarding to Alighting Distance/Origin to Destination Distance	the result of this formula is less than .3	There is at least one transfer involved in the trip		No
Origin to Boarding distance divided by Origin to Destination distance	Origin to Boarding Distance/Origin to Destination Distance	the result of this formula is 1 or greater	there is at least one transfer from origin to boarding		No
	Origin to Boarding Distance/Origin to Destination Distance	the result of this formula is 1 or greater	Access Mode - <u>ANY USE OF A VEHICLE</u> (i.e., dropped off, rode with others, drove, taxi...)		No
	Origin to Boarding Distance/Origin to Destination Distance	the result of this formula is 1 or greater	Access Mode - Walk/Wheelchair/Skateboard	there are no transfers from origin to boarding	Yes
Alighting to Destination	Alighting to Destination Distance/Origin to Destination Distance	the result of this formula is 1 or greater	there is at least one transfer from alighting to destination		No

divided by Origin to Destination	Alighting to Destination Distance/Origin to Destination Distance	the result of this formula is 1 or greater	Egress Mode - <u>ANY USE OF A VEHICLE</u> (i.e., will get picked up, ride with others, drive, taxi...)		No
----------------------------------	--	--	--	--	----

ETC has a dedicated team whose priority is reviewing and editing completed records using an online visual review tool. The TRT reviewed all completed records collected for the survey, paying special attention to records that were automatically flagged automated distance checks. Typically, around 10% of all records receive an automatic flag. The following actions generally result in changes that allow about 30% of those records that are automatically flagged to be retained, or approximately 3% of all completed surveys.

Pre-Processing General Issues and Actions

Table 1-6 describes the general issues that could occur within a trip where changes may have been appropriate.

TABLE 1-6: GENERAL ISSUES

Issue	Description of Issue	Action
Origin/Destination Condition 1	Origin/Destination appears incorrect because the wrong location of a multiple-location organization was selected	If for example, an Origin/Destination appears illogical based on the college campus that was selected, but an appropriate campus of the same college does appear logical given the other points and answer choices of the trip, then the appropriate campus will be selected.
Origin/Destination Condition 2	Origin/Destination appears to have been geocoded to the incorrect city/state	If for example, an Origin/Destination appears illogical based on the city/state that was geocoded, but the address/intersection is logical within the trip if the city/state are changed. This occurs occasionally because the surveyor selects the wrong choice from the list of possible address choices that appear in the online survey instrument, then the appropriate address information will be inserted.
Access/Egress Mode	Access/Egress Mode seems illogical based on trip	If the access/egress mode involves the use of a vehicle and the distance from either origin to boarding or alighting to destination is less than .2 miles, then the access/egress mode is recoded to walk/walked and that change will be reflected in the database.
Directionality of Record	Boarding and alighting locations indicate that the trip is going in the opposite direction of what was selected by the surveyor.	Change Direction of Route Selected and if necessary update boarding and alighting locations based on appropriate direction.

Transfer Issues and Actions

Table 1-7 describes the transfer issues that could occur within a trip where changes may have been appropriate.

TABLE 1-7: TRANSFER ISSUES

Issue #	Description of Issue	Action
Transfer Issue - 1	The transfer(s) seems illogical based on either the origin to boarding or alighting to destination	If the transfer appears to have been selected incorrectly based on surveyor mis-selection error (IE Route 24 selected which is illogical, but Route 23 is logical) or passenger error (passenger gives inaccurate transfer), then an appropriate transfer(s) will be inserted based on the geocoded points of the trip (origin and destination), the time of day of the trip and the direction of travel. If no appropriate transfers can be found, then the record will be removed from the database.
Transfer Issue - 2	The transfer(s) seems unnecessary based on either the origin to boarding or alighting to destination	If the transfer(s) appears to be unnecessary because the distance from the origin to boarding or alighting to destination is less than 0.2 miles, then the trip will be reviewed in further detail to determine if the transfer(s) are inappropriate. Aspects that will determine appropriateness are: the landscape (0.1 miles for example is a very short distance but a river in-between the origin and boarding location could require an individual to use a transfer as opposed to being able to walk), disability, age, and alternate access/egress modes (IE if someone indicates walking 1 mile from origin to boarding but then indicates taking 2 transfers from alighting to destination to travel a total of 0.1 miles they have likely indicated transfers for a future trip later in the day). <i>NOTE: The 0.2 distance is only used as guideline to create a flag for closer review. Typically, only extreme distances have transfers removed</i>
Transfer Issue - 3	The passenger indicated that they did not use a transfer but based on their access/egress mode and the distance between either the origin to boarding or alighting to destination suggests that a transfer should have been used.	If the access/egress mode is "walked/walk" and no transfer is indicated, and the distance between either origin to boarding or alighting to destination is greater than 2 miles, then an appropriate transfer(s) will be inserted based on the geocoded points of the trip (origin and destination), the time of day of the trip and the direction of travel. If no appropriate transfers can be found, then the record will be removed from the database.
Transfer Issue - 4	Duplicate Transfers in the Route Path	If duplicate transfers exist in the route path, the trip path is reviewed visually to determine which route(s) were incorrectly entered. If a review of the record suggests that the transfer route(s) is/are unnecessary then they will be removed. If the transfers suggest that trip is a round trip (i.e. home to home) and not a one-way trip, then the record will be removed from the database.

Post-Processing Additional Checks

After all records were reviewed by the TRT, the next step in this process involved the application of a series of QA/QC “non-trip” checks. Non-trip checks are described as anything not pertaining to the respondent’s actual trip, i.e. demographic information.

Non-trip related checks included:

- Ensuring the respondents who indicated that they were employed also reported that at least one member of their household was employed.
- Ensuring the time of day a survey was completed was reasonable given the published operating schedule for the route.
- Ensuring that the appropriate fare type was used in response to the age of respondent.
- Checking that there is a representative demographic distribution based on age, gender, and income status.
- Removing any personal contact information used for quality control purposes during the data collection portion of the project to protect the anonymity of the respondents.

Once all records had gone through the pre-processing and post-processing QA/QC checks, those that were deemed complete and usable were then used to update the completion report used by the field supervisors to ensure that all goals had been met. After the final high-level review was completed, metadata (a codebook) was created to suitably explain the data in the database.

Survey Weighting and Expansion

Data Expansion Overview

When survey goals are created, they are typically based off a percentage of the average weekday ridership for the routes in the system. That is further broken down by time periods (ideally, they are further broken down by direction but this level of detail was not available). The time periods that are created are based off the specific needs of the client. Once a sample percentage is agreed upon, the goals for the survey collection are based off the ridership for each route by time period and then multiplied by the sampling percentage.

The purpose of developing survey goals is to collect an appropriate number of survey records that will be “Expanded” to represent the total average weekday ridership of each route by time period. The same ridership, February 2018, used to prepare for the data collection was also used for the expansion.

Linked Trip Expansion Factors for All Records

The linked trip expansion factor helps to account for the number of transfers that were made by each passenger, so the linked expansion factors should better represent the overall system. Linked expansion factors are generated after the unlinked expansion factors are created.

The equation that is used to calculate the linked trip multiplying factor is shown below:

$$\text{Linked Trip Multiplying Factor} = [1 / (1 + \# \text{ of transfers})]$$

If a passenger did not make a transfer, the linked trip multiplying factor would be 1.0 because the person would have only boarded one vehicle. If a person made two transfers, the linked trip expansion factor would be 0.33 because the person would have boarded three transit vehicles during his/her one-way trip. Once the linked trip multiplier is created it is multiplied by the unlinked expansion factor to create the linked expansion factor.

General Rule for Expansion Factors

While there are no specific guidelines for the expansion factor values, ETC uses a guideline of keeping expansion factors below 3 times the average expansion factor based on the sampling percentage. This is done to keep any one record from representing a markedly high number of riders in the system. The formula for determining this guideline is:

$$1 / (\text{Sampling \%}) \times 3 = \text{Guideline Weight Factor}$$

This guideline was held for the Survey.

Survey Decomposition Analysis

Decomposition analysis measures the overall representativeness of the Survey records relative to linked and unlinked trips on an individual route basis. Self-enumeration surveys have historically suffered from substantial errors in route level boarding levels when linked trips were determined by simply dividing the boarding factor by one plus the number of transfers. For example, in systems with both local bus and urban rail routes, the survey typically displayed significant differences in how many local bus riders indicated that they had transferred to/from urban rail compared to the same statistic measured from those who were interviewed on an urban rail route. Difficult decisions had to be made regarding what was the actual value of such transfers. This is not a concern for the Survey.

The advent of the personal interview, coupled with tablet technology, and more effective management of surveyors has greatly reduced this issue. The decomposition analysis examines each record and the recorded sequence of routes and tabulates boardings for each route using this information. After all records have been examined, total boardings by route are summarized and compared with the observed level of boardings. The result of this analysis will help to determine the level of correlation between observed and estimated boardings by route.

The decomposition analysis below and on the following page shows the summed link factors for the routes for which the survey was conducted along with the summed linked weight factors for those same routes that was captured in transfer information for both previous transfers and transfers that would occur after the rider alighted the route they were being surveyed on. The table below and on the following page shows that the overall results for the onboard survey do an excellent job of representing the system. The routes that deviate the farthest from the summed linked factors compared to the observed counts are the routes that are expected to deviate the most as they are low volume ridership routes and therefore have a higher inherit error probability. The higher volume Razorback routes (routes over 500 daily boardings) which make up approximately 87% of the project's ridership, once summed, are extremely close to the overall ridership for those routes as seen in the table below:

*Higher Volume Routes (Routes over 500 daily boardings)							
Route	Sum of Linked Trips						
	Route Surveyed	Previous Transfers	Next Transfers	Total Summed Linked			
*Higher Volume Routes	8517.9	257.3	238.7	9013.9	9058	44.1	0.5%

CHAPTER 2: SURVEY RESULTS

This section highlights selected demographic and trip-related findings from the Survey. The database used for the tables/graphs in this chapter and all chapters were expanded based on weekday linked weight factors created during the data expansion process.

Unlinked trips vs. Linked Trips

An unlinked passenger trip measures a trip as every time a rider boards and alights a bus. A linked passenger trip is the entire trip from origin to destination on the transit system. Even if a rider makes several transfers during a one-way trip, the trip is counted as one linked trip on the system. For example, a rider making a single trip with a transfer in the middle counts as two unlinked trips versus one linked trip.

Overall Results Summary

The following trip base and demographic attributes are established based upon survey responses collected from the study. These tables and figures created in this section show both ORT, Razorback results, and both systems combined along with results at the route level to represent the entire NWARPC region.

Male (55.2%) riders comprise approximately more than half of all weighted trips compare to female (44.7%) riders. More than three quarters (78.7%) of trips were made by riders between 19-34 years old, and more than a quarter (32.1%) are riders that have been riding Transit for 3 or more years.

The majority of riders (60.2%) household income is less than \$19,999.00 with 61.5 percent of ORT riders who live in households that earn less than \$15,000.00. Seventy percent (70.0%) of trips made were made by riders who live in one or two-person households. Only fourteen percent of trips were made by riders who are employed full-time.

Over half (60.8%) of riders are White / Caucasian and twenty five percent of riders speak another language other than English at home.

Riders were asked “what type of place they were coming from”. Almost half (49.8%) of all riders’ origin location was home, hotel, or dorm or apartment near campus. Figure 2-1 and Table 2-1 show the origin place type by system. Table 2-1A shows the origin place type by route.

Riders were asked “what type of place they were going to”. Combined, forty percent (39.9%) of riders’ destination location was The University of Arkansas. Almost half (43.5%) Razorback Transit riders reported going to the University of Arkansas. ORT riders’ main destination locations were home (38.8%) and shopping (25.4%). Figure 2-3 and Table 2-3 show the origin place type by system. Table 2-3A shows the origin place type by route.

The following tables and figure are based off NWARPC's model trip types. The trip type is based off the riders' origin and destination place types. Sixty-six percent (65.7%) off all trip types are Home Based – University of Arkansas with 71.8 percent of U of A riders traveling between home and the university. Figure 2-6 shows trip types by system. Table 2-6 shows trip types by time-of-day and system. Table 2-6A shows trip types by route and time-of-day.

The following tables (Tables 2-14 through 2-19) are based off responses provided by residents. For visitors (0.6% of responses), these questions were skipped.

Almost three-quarters (70.8%) of ORT riders reported that they did not have any vehicles available to their household in comparison to twenty percent (19.8%) of Razorback riders reporting not to having any vehicles available to their household. Table 2-14 and Figure 2-14 show the number of vehicles are available to each riders' household by system. Table 2-14A shows the number of household vehicles at the route level.

The following tables and figure (Tables 2-15, 2-15A, and Figure 2-15) are responses based off if the rider had one or more vehicles available to their household which is 75.8 percent of respondents. Eighty-five percent of respondents who have a household vehicle, could have used that vehicle on their one-way trip, showing that over three quarters of riders are choice riders.

Riders were asked “how many people live in their household”. Nearly three quarters (70%) of riders are one or two-person households. The majority (64.1%) of one-person households come from the ORT system. Figure 2-16 and Table 2-16 show the number of persons living in respondents’ households by system. Table 2-16A shows the number of persons living in respondents’ households by route.

Comparative Analysis

The following tables and figures represent comparisons between the 2012 and 2018 surveys. The comparisons are based off weighted rider characteristics and demographics. Many comparisons cannot be made between the two surveys since some questions and responses differ between the 2018 and 2012 surveys and there have been significant changes in the structure of bus routes. The 2012 survey findings do not list many Razorback rider characteristics and for these responses, only ORT comparisons are made.

The 2018 Survey shows an increase in male riders on both systems (ORT and Razorback Transit). There is a minimal (3.0%) increase in male ridership for the 2018 Survey for ORT. There is a ten percent (10%) increase in male riders on Razorback Transit in the 2018 Survey. Figure 2-27 and Table 2-27 show the differences in gender between the two surveys.

FIGURE 2-27: GENDER

TABLE 2-27: GENDER

Gender	ORT 2018	ORT 2012	Razorback 2018	Razorback 2012
Male	56.4%	53.4%	55.1%	45.0%
Female	43.6%	46.6%	44.8%	55.0%
Grand Total	100.0%	100.0%	100.0%	100.0%

In the 2018 Survey, there are almost ten percent (9.8%) less college students that ride ORT than the 2012 Survey. Razorback Transit roughly remained the same (2.6 % increase) in regard to college students that ride the bus. Figure 2-28 and Table 2-28 show the differences between the two surveys about riders that attend college.

FIGURE 2-28: COLLEGE STUDENT STATUS

TABLE 2-28: COLLEGE STUDENT STATUS

College Student	ORT 2018	ORT 2012	Razorback 2018	Razorback 2012
Yes - College / University / Community College	22.4%	32.2%	87.0%	84.4%

There was a large increase (37.7%) with riders living in one-person households for ORT in comparison to the 2012 results. The 2012 Survey had 73.6 percent (73.6%) of ORT riders living in households with two persons or more while the 2018 Survey has 35.9 percent (35.9%) of ORT riders claiming households with two or more persons. Figure 2-29 and Table 2-29 show the results of the number of persons living in ORT riders' households from the 2018 and 2012 surveys.

FIGURE 2-29: HOUSEHOLD RESIDENTS

TABLE 2-29: HOUSEHOLD RESIDENTS

Household Residents	ORT 2018	ORT 2012
One (1)	64.1%	26.4%
Two (2)	11.5%	27.1%
Three (3)	8.9%	18.8%
Four (4)	9.2%	10.6%
Five (5) or More	6.3%	17.1%
Grand Total	100.0%	100.0%

More ORT riders (16.5%) in the 2018 Survey reported not having any household vehicles than in comparison with the 2012 results. Figure 2-30 and Table 2-30 show the differences between the ORT 2018 and 2012 surveys number of household vehicles.

FIGURE 2-30: HOUSEHOLD VEHICLES

TABLE 2-30: HOUSEHOLD VEHICLES

Household Vehicles	ORT 2018	ORT 2012
None (0)	70.8%	54.3%
One (1)	14.7%	29.0%
Two (2)	7.5%	11.1%
Three (3)	6.1%	2.6%
Four (4) or More	0.8%	3.0%
Grand Total	100.0%	100.0%

There were no major differences in riders age categories between the 2018 and 2012 surveys. Figure 2-31 and Table 2-31 show the age categories for both surveys.

FIGURE 2-31: AGE

TABLE 2-31: AGE

Age	ORT 2018	ORT 2012	Razorback 2018	Razorback 2012
6-34	39.8%	40.7%	89.0%	87.3%
35 and older	60.2%	59.3%	11.0%	12.7%
Grand Total	100.0%	100.0%	100.0%	100.0%

Comparisons between the 2018 and 2012 surveys shows a significant decrease (12.4%) in ORT riders who possess a driver's license. Figure 2-32 and Table 2-32 show the differences between the 2018 and 2012 ORT results for driver's license status.

FIGURE 2-32: DRIVER'S LICENSE STATUS

TABLE 2-32: DRIVER'S LICENSE STATUS

Driver's License Status	ORT 2018	ORT 2012
NO	66.1%	53.7%
YES	33.9%	46.3%
Grand Total	100.0%	100.0%

Household income categories remained very similar between the 2018 and 2012 surveys for ORT riders. There were minor (9.9%) differences between the income ranges of \$ 20,000 - \$35,000. Figure 2-33 and Table 2-23 show ORT household income responses for both surveys.

FIGURE 2-33: HOUSEHOLD INCOME

TABLE 2-33: HOUSEHOLD INCOME

Household Income	ORT 2018	ORT 2012
Under \$19,999	72.0%	72.0%
\$20,000 - \$34,999	17.6%	13.2%
\$35,000 - \$49,999	4.0%	8.5%
\$50,000 - \$74,999	4.8%	4.8%
\$75,000 or more	1.6%	1.5%
Grand Total	100.1%	100.0%

APPENDICES

APPENDIX A: SURVEY INSTRUMENT

Northwest Arkansas Area 2018 Transit On Board Survey

Please take a few minutes to answer a few questions to help us plan for your transit needs.

All personal information will be kept strictly confidential and **WILL NOT** be shared or sold.

What is your **HOME ADDRESS** (please be specific, ex: 123 W. Main St):
(If you are visiting the Northwest Arkansas area, please list the **hotel name** or address where you are staying)

Street Address

City

State

Zip Code

COMING FROM?

1. What type of place are you **COMING FROM NOW?**

(the starting place for your one-way trip)

- ☐ Work
- ☐ Work related
- ☐ College / University (students only)
- ☐ School K-12 (students only)
- ☐ Medical / Doctor / Clinic / (non-work)
- ☐ Shopping
- ☐ Personal Business
- ☐ Restaurant
- ☐ Recreation / Sightseeing
- ☐ Social Visit / Church
- ☐ Airport (passengers only)
- ☐ Your HOME → Go to Question #4
- ☐ Your DORM (Near Campus Apt) → Go to Question #4
- ☐ Other: _____

2. What is the **NAME** of the place you are coming from now?

3. What is the **EXACT ADDRESS** of this place? (OR Intersection if you do not know the exact address:)

City: _____ State: _____ Zip: _____

4. How did you **GET FROM** your origin (the place in Question #1) **TO THE VERY FIRST** bus you used for this one-way trip?

- ☐ Walk
- ☐ Wheelchair
- ☐ Personal Bike
- ☐ Bike share
- ☐ Paratransit
- ☐ Was dropped off by someone (answer 4a)
- ☐ Drove alone and parked (answer 4a)
- ☐ Drove or rode with others and parked (answer 4a)
- ☐ Car share (e.g. Zipcar, etc.) (answer 4a)
- ☐ Taxi (answer 4a)
- ☐ Uber, Lyft, etc. (answer 4a)
- ☐ Other: _____

4a. Where did you board the first bus you used for this one-way trip
(Nearest intersection / Park & Ride lot / Transit Center / Stop Name):

5. Where did you get **ON this bus**? Please provide the nearest intersection / Transit Center / Station Name / Park & Ride lot:

GOING TO?

6. What type of place are you **GOING TO NOW?**

(the ending place for your one-way trip)

- ☐ Work
- ☐ Work related
- ☐ College / University (students only)
- ☐ School K-12 (students only)
- ☐ Medical / Doctor / Clinic / (non-work)
- ☐ Shopping
- ☐ Personal Business
- ☐ Restaurant
- ☐ Recreation / Sightseeing
- ☐ Social Visit / Church
- ☐ Airport (passengers only)
- ☐ Your HOME → Go to Question #9
- ☐ Your DORM (Near Campus Apt) → Go to Question #9
- ☐ Other: _____

7. What is the **NAME** of the place you are going to now?

8. What is the **EXACT ADDRESS** of this place? (OR Intersection if you do not know the exact address:)

City: _____ State: _____ Zip: _____

9. How will you **GET TO** your destination (listed in Question #6) after you get off the **LAST** bus you will use for this one-way trip?

- ☐ Walk
- ☐ Wheelchair
- ☐ Personal Bike
- ☐ Bike share
- ☐ Paratransit
- ☐ Be picked up by someone (answer 9a)
- ☐ Get in a parked vehicle & drive alone (answer 9a)
- ☐ Get in a parked vehicle & drive/ride w/others (answer 9a)
- ☐ Car share (e.g. Zipcar, etc.) (answer 9a)
- ☐ Taxi (answer 9a)
- ☐ Uber, Lyft, etc. (answer 9a)
- ☐ Other: _____

9a. Where will you get off the last bus you are using for this one-way trip (Nearest intersection / Park & Ride lot / Transit Center / Stop Name):

10. Where will you get **OFF this bus**? Please provide the nearest intersection / Transit Center / Station Name / Park & Ride lot:

11a. Did you transfer FROM another bus **BEFORE** getting on this bus?

☐ Yes ☐ No

11b. Will you transfer TO another bus **AFTER** getting off this bus?

☐ Yes ☐ No

11c. Please list the **BUS ROUTES** in the exact order you use them for this one-way trip

START → → → → → **END**

1st Route

2nd Route

3rd Route

4th Route

Continue

OTHER INFORMATION ABOUT THIS TRIP

12. What time did you **BOARD this bus**? _____ : _____ am / pm (circle one)
13. Will you (or did you) make this same trip in exactly the opposite direction today?
☐ No ☐ Yes - At what time did / will you leave for this trip in the opposite direction? _____:_____ am/pm (circle one)
14. What fare payment methods did you use for this one-way trip? (select all that apply)
☐ Cash ☐ Day Pass ☐ Monthly Pass ☐ 10 Ride Pass
Free fares (ORT): ☐ Senior (75+) ☐ Veteran ☐ Children (under 6) ☐ Razorback / ORT
Transfer Pass (NW Ark mall to Route 3 & 4)
15. What type of fare was this? ☐ Adult
Reduced Fare: ☐ Youth (6-18) ☐ Senior (age 60-74) / Disabled ☐ Student (College/University)
16. If transit service were not available, how would you have made this trip?
☐ Walk ☐ Bicycle ☐ Drove myself ☐ Ride with someone else
☐ Taxi ☐ TNC (e.g. Uber, Lyft) ☐ Car share (e.g. Zip Car) ☐ Would not make this trip
17. Do you ever use any of the following services rather than public transit? (check all that apply)
☐ TNC (e.g. Uber, Lyft) ☐ Car Share (e.g. Zipcar) ☐ Neither
18. How long have you been riding transit?
☐ Less than 6 months ☐ 6 – 12 months ☐ 1 – 2 years ☐ More than 10 years
☐ 3 – 6 years ☐ 7 – 10 years ☐ First time riding
19. How often do you ride transit?
☐ 6 days a week ☐ 5 days a week ☐ 3 or 4 days a week ☐ 1 or 2 days a week
☐ 1 or 2 days a month ☐ Once in a while ☐ First time riding

ABOUT YOU AND YOUR HOUSEHOLD

20. Are you a visitor to the Northwest Arkansas region? ☐ No ☐ Yes (if YES, please skip to Q26)
21. How many working vehicles (cars, trucks, or motorcycles) are available to your household? _____ vehicles
21a. [If #21 is more than NONE] Could you have used one of these vehicles for this trip? ☐ Yes ☐ No
22. Including YOU, how many people live in your household? _____ people
23. Including YOU, how many part-time/full-time workers live in your household? _____ people
24. What is your employment status? (check the one response that BEST describes you)
☐ Employed full-time ☐ Not currently employed ☐ Retired
☐ Employed part-time ☐ Disabled and unable to work ☐ Homemaker
25. What is your student status? (check the one response that BEST describes you)
☐ Not a student ☐ Yes – College / University / Community College
☐ Yes – K - 12th grade ☐ Yes – Vocational / Technical / Trade School ☐ Other _____
26. Do you have a valid driver's license? ☐ Yes ☐ No
27. What is your AGE?
☐ Under 6 ☐ 6-18 ☐ 19-21 ☐ 22-34 ☐ 35-50 ☐ 51-59 ☐ 60-74 ☐ 75 and older
28. What is your race / ethnicity? (check all that apply)
☐ American Indian/Alaska Native ☐ Asian ☐ Black/African/African American ☐ Hispanic/Latino
☐ Native Hawaiian/Pacific Islander ☐ White/Caucasian ☐ Other: _____
29. What is your gender? ☐ Male ☐ Female ☐ Other _____
30. Do you speak a language other than English at home? ☐ No ☐ Yes - Which language? _____
30a. [If #30 is Yes] How well do you speak English? ☐ Very Well ☐ Well ☐ Less than well ☐ Not at all
31. Which of the following BEST describes your TOTAL ANNUAL HOUSEHOLD INCOME in 2017 before taxes?
☐ Less than \$15,000 ☐ \$25,000 - \$29,999 ☐ \$40,000 - \$44,999 ☐ \$60,000 - \$74,999
☐ \$15,000 - \$19,999 ☐ \$30,000 - \$34,999 ☐ \$45,000 - \$49,999 ☐ \$75,000 - \$99,999
☐ \$20,000 - \$24,999 ☐ \$35,000 - \$39,999 ☐ \$50,000 - \$59,999 ☐ Over \$100,000

Please provide your name and phone number in case a follow up is needed based on your responses provided.

Your Name: _____

Phone Number: (____) _____

Thank you for your help!

APPENDIX B: DATA DICTIONARY

Northwest Arkansas Regional Planning Commission (NWARPC) System Wide Origin and Destination Survey

FIELD NAME	DESCRIPTION	CODE VALUES
ID	Unique Identifier for each record	Actual Value
WEEKDAY	If the record was collected on a weekday or weekend	Actual Value
COMPLETED_DATE	Date survey was conducted	Actual Value
ROUTE_SURVEYED[Code]	Route survey was conducted on (code)	Codes provided upon request
ROUTE_SURVEYED	Route survey was conducted on	Actual Value
RESIDENT_OR_DORM[Code]	If respondent lives on the University of Arkansas campus or in a near-campus apartment (code)	1=NO 2=YES
RESIDENT_OR_DORM	If respondent lives on the University of Arkansas campus or in a near-campus apartment	Actual Value
HOME_ADDRESS [ADDR]	Respondent's home address	Actual Value
HOME_ADDRESS [CITY]	Respondent's home city	Actual Value
HOME_ADDRESS [STATE]	Respondent's home state	Actual Value
HOME_ADDRESS [ZIP]	Respondent's home zip code	Actual Value
HOME_ADDRESS [LAT]	Respondent's home latitude	Actual Value
HOME_ADDRESS [LONG]	Respondent's home longitude	Actual Value
DORM_ADDRESS [ADDR]	Respondent's dorm address	Actual Value
DORM_ADDRESS [CITY]	Respondent's dorm city	Actual Value
DORM_ADDRESS [STATE]	Respondent's dorm state	Actual Value
DORM_ADDRESS [ZIP]	Respondent's dorm zip code	Actual Value
DORM_ADDRESS [LAT]	Respondent's dorm latitude	Actual Value
DORM_ADDRESS [LONG]	Respondent's dorm longitude	Actual Value
ORIGIN_PLACE_TYPE[Code]	Type of place respondent is coming from now (code)	1=Your usual WORKPLACE 2=Other College / University (students only) 3=School (K-12) (students only) 4=Medical / Doctor / Clinic (non-work) 5=Shopping 6=Social Visit / Church 7=Recreation / Sightseeing 8=Airport (passengers only) 9=Restaurant 10=Your HOME / HOTEL 11=Work related 12=Your DORM (or apartment near campus) 14=Personal business 15=University of Arkansas (students only)

PREV_TRAN_3_ON_BUS [LONG]	Longitude of respondent's boarding location for their third transfer from origin	Actual Value
PREV_TRAN_3_OFF_BUS [STPID]	Stop ID of respondent's alighting location for their third transfer from origin	Actual Value
PREV_TRAN_3_OFF_BUS [LAT]	Latitude of respondent's alighting location for their third transfer from origin	Actual Value
PREV_TRAN_3_OFF_BUS [LONG]	Longitude of respondent's alighting location for their third transfer from origin	Actual Value
NEXT_TRAN_1_ON_BUS [STPID]	Stop ID of respondent's boarding location for their first transfer to destination	Actual Value
NEXT_TRAN_1_ON_BUS [LAT]	Latitude of respondent's boarding location for their first transfer to destination	Actual Value
NEXT_TRAN_1_ON_BUS [LONG]	Longitude of respondent's boarding location for their first transfer to destination	Actual Value
NEXT_TRAN_1_OFF_BUS [STPID]	Stop ID of respondent's alighting location for their first transfer to destination	Actual Value
NEXT_TRAN_1_OFF_BUS [LAT]	Latitude of respondent's alighting location for their first transfer to destination	Actual Value
NEXT_TRAN_1_OFF_BUS [LONG]	Longitude of respondent's alighting location for their first transfer to destination	Actual Value
NEXT_TRAN_2_ON_BUS [STPID]	Stop ID of respondent's boarding location for their second transfer to destination	Actual Value
NEXT_TRAN_2_ON_BUS [LAT]	Latitude of respondent's boarding location for their second transfer to destination	Actual Value
NEXT_TRAN_2_ON_BUS [LONG]	Longitude of respondent's boarding location for their second transfer to destination	Actual Value
NEXT_TRAN_2_OFF_BUS [STPID]	Stop ID of respondent's alighting location for their second transfer to destination	Actual Value
NEXT_TRAN_2_OFF_BUS [LAT]	Latitude of respondent's alighting location for their second transfer to destination	Actual Value
NEXT_TRAN_2_OFF_BUS [LONG]	Longitude of respondent's alighting location for their second transfer to destination	Actual Value
TIME_ON[Code]	At what time did respondent board this bus/rail (code)	A=12:00 - 6:00 am B=6:00 - 7:00 am C=7:00 - 8:00 am D=8:00 - 9:00 am E=9:00 - 10:00 am F=10:00 - 11:00 am G=11:00 am - 11:59 am H=12:00 - 1:00 pm I=1:00 - 2:00 pm J=2:00 - 3:00 pm K=3:00 - 4:00 pm L=4:00 - 5:00 pm M=5:00 - 6:00 pm N=6:00 - 7:00 pm O=7:00 - 8:00 pm P=8:00 - 9:00 pm Q=9:00 - 10:00 pm R=10:00 pm - 12:00 pm
TIME_ON	At what time did respondent board this bus/rail	Actual Value

Northwest Arkansas Regional Planning Commission (NWARPC) System Wide Origin and Destination Survey

FIELD NAME	DESCRIPTION	CODE VALUES
TIME_PERIOD		Actual Value
TRIP_IN_OPPO_DIR[Code]	If respondent took the same trip in the opposite direction (code)	1=Yes 2=No
TRIP_IN_OPPO_DIR	If respondent took the same trip in the opposite direction	Actual Value
OPPO_DIR_TRIP_TIME[Code]	At what time did respondent board their return trip bus/rail (code)	A=12:00 - 6:00 am B=6:00 - 7:00 am C=7:00 - 8:00 am D=8:00 - 9:00 am E=9:00 - 10:00 am F=10:00 - 11:00 am G=11:00 am - 11:59 am H=12:00 - 1:00 pm I=1:00 - 2:00 pm J=2:00 - 3:00 pm K=3:00 - 4:00 pm L=4:00 - 5:00 pm M=5:00 - 6:00 pm N=6:00 - 7:00 pm O=7:00 - 8:00 pm P=8:00 - 9:00 pm Q=9:00 - 10:00 pm R=10:00 pm - 12:00 pm
OPPO_DIR_TRIP_TIME	At what time did respondent board their return trip bus/rail	Actual Value
KIND_OF_FARE[Code]	Type of fare payment respondent used on their one-way trip (code)	1=Cash 2=Day Pass 3=Monthly Pass 4=10 Ride Pass 5=Senior (75+) 6=Veteran 7=Children (under 6) 8=Razorback / ORT Transfer Pass (NW Ark Mall to Route 3 & 4) 9=RAZORBACK ONLY - NO FARE 99=Other
KIND_OF_FARE	Type of fare payment respondent used on their one-way trip	Actual Value
KIND_OF_FARE [Other]	Type of fare payment respondent used on their one-way trip (other)	Actual Value
FARE_CATEGORY[Code]	Type of fare respondent paid (code)	1=Adult 2=Senior (age 60-74) / Disabled 3=Student (College/University) 4=Youth (6-18) 99=Other
FARE_CATEGORY	Type of fare respondent paid	Actual Value
FARE_CATEGORY [Other]	Type of fare respondent paid (other)	Actual Value
OTHER_TRAVEL_MEANS[Code]	How respondent would have made the trip if transit service were unavailable (code)	1=Walk 2=Bicycle 3=Drove myself 4=Ride with someone else 5=Taxi 6=TNC (e.g. Uber, Lyft) 7=Car Share (e.g. Zipcar) 8=Would not make this trip 99=Other
OTHER_TRAVEL_MEANS	How respondent would have made the trip if transit service were unavailable	Actual Value
OTHER_TRAVEL_MEANS [Other]	How respondent would have made the trip if transit service were unavailable (other)	Actual Value
USE_TNC	If respondent indicated they use TNC (e.g. Uber, Lyft)	Actual Value
USE_CARSHARE	If respondent indicated they use Car Share (e.g. Zipcar)	Actual Value
DO_NO_USE_TNC_OR_CARSHARE	If respondent indicated they use Neither TNC or Carshare	Actual Value
HOW_LONG_TRANSIT[Code]	How long respondent has been riding transit (code)	1=Less than 6 months 2=6-12 months 3=1-2 years 4=3-6 years 5=7-10 years 6=More than 10 years 7=First time riding
HOW_LONG_TRANSIT	How long respondent has been riding transit	Actual Value
RIDE_FREQUENCY[Code]	How often respondent rides transit (code)	1=6 days a week 2=5 days a week 3=3 or 4 days a week 4=1 or 2 days a week 5=1 or 2 days a month 6=Once in a while 7=First time riding
RIDE_FREQUENCY	How often respondent rides transit	Actual Value
RES_OR_VIS[Code]	If respondent is a visitor to the Northwest Arkansas region (code)	NO=No YES=Yes
RES_OR_VIS	If respondent is a visitor to the Northwest Arkansas region	Actual Value
COUNT_VH_HH[Code]	Number of vehicles in respondent's household (code)	0=None (0) 1=One (1) 2=Two (2) 3=Three (3) 4=Four (4) 5=Five (5) 6=Six (6) 7=Seven (7) 8=Eight (8) 9=Nine (9) 10=Ten or more (10+)
COUNT_VH_HH	Number of vehicles in respondent's household	Actual Value
VEH_USE[Code]	If respondent could have used a household vehicle to make their trip (code)	NO=No YES=Yes
VEH_USE	If respondent could have used a household vehicle to make their trip	Actual Value
HH_SIZE[Code]	Number of members in respondent's household (code)	1=One (1) 2=Two (2) 3=Three (3) 4=Four (4) 5=Five (5) 6=Six (6) 7=Seven (7) 8=Eight (8) 9=Nine (9) 10=Ten or more (10+)
HH_SIZE	Number of members in respondent's household	Actual Value

Northwest Arkansas Regional Planning Commission (NWARPC) System Wide Origin and Destination Survey

FIELD NAME	DESCRIPTION	CODE VALUES
EMPLOYED_HH_MEMBERS[Code]	Including them, how many part-time/full-time workers live in respondents household (code)	0=None (0) 1=One (1) 2=Two (2) 3=Three (3) 4=Four (4) 5=Five (5) 6=Six (6) 7=Seven (7) 8=Eight (8) 9=Nine (9) 10=Ten or more (10+)
EMPLOYED_HH_MEMBERS	Including them, how many part-time/full-time workers live in respondents household	Actual Value
STATUS_EMPLOYMENT[Code]	Employment status of respondent (code)	1=Employed full-time 2=Employed part-time 3=Not currently employed 4=Disabled and unable to work 5=Retired 6=Homemaker
STATUS_EMPLOYMENT	Employment status of respondent	Actual Value
STUDENT_STATUS[Code]	Respondent's student status (code)	1=Not a student 2=Yes - College / University / Community College 3=Yes - K-12th grade 5=Yes - Vocational / Technical / Trade school
STUDENT_STATUS	Respondent's student status	Actual Value
DRIVER_LICENSE[Code]	If respondent has a valid driver's license (code)	NO=No YES=Yes
DRIVER_LICENSE	If respondent has a valid driver's license	Actual Value
AGE[Code]	Age of respondent (code)	1=Under 6 2=6-18 3=19-21 4=22-34 5=35-50 6=51-59 7=60-74 8=75 and older
AGE	Age of respondent	Actual Value
ETHNIC_LATINO_HISP	If respondent indicated they are Latino/Hispanic	Actual Value
ETHNIC_BLK_AFR_AMR	If respondent indicated they are Black/African American	Actual Value
ETHNIC_ASIAN	If respondent indicated they are Asian	Actual Value
ETHNIC_AM_IND_ALSK_NAT	If respondent indicated they are American Indian/Alaskan Native	Actual Value
ETHNIC_NAT_HAW_PAC_ISL	If respondent indicated they are Native Hawaiian/Pacific Islander	Actual Value
ETHNIC_WHITE	If respondent indicated they are White	Actual Value
ETHNIC_OTHER	If respondent indicatd they were Other	Actual Value
GENDER[Code]	Respondent's gender (code)	1=Male 2=Female 99=Other
GENDER	Respondent's gender	Actual Value
GENDER [Other]	Respondent's gender (other)	Actual Value
HOME_LANG_OTHER[Code]	Does respondent speak a language other than English spoken in home (code)	1=Yes 2=No
HOME_LANG_OTHER	Does respondent speak a language other than English spoken in home	Actual Value
HOME_OTHER_LANG[Code]	Language respondent speaks at home other than English (code)	Codes provided upon request
HOME_OTHER_LANG	Language respondent speaks at home other than English	Actual Value
HOME_OTHER_LANG [Other]	Language respondent speaks at home other than English (other)	Actual Value
ENGLISH_ABILITY[Code]	How well did respondent speaks English (code)	A1=Very well A2=Well A3=Not at all A4=Less than well A99=Unknown
ENGLISH_ABILITY	How well did respondent speaks English	Actual Value
INCOME[Code]	Total annual household income (code)	1=less than \$15,000 2=\$15,000 - \$19,999 3=\$20,000 - \$24,999 4=\$25,000 - \$29,999 6=\$30,000 - \$34,999 8=\$35,000 - \$39,999 9=\$40,000 - \$44,999 10=Over \$100,000 11=\$45,000 - \$49,999 12=\$50,000 - \$59,999 13=\$60,000 - \$74,999 14=\$75,000 - \$99,999
INCOME	Total annual household income	Actual Value
FINAL_BOARDING_LAT	Respondent's final boarding latitude	Actual Value
FINAL_BOARDING_LON	Respondent's final boarding longitude	Actual Value
FINAL_ALIGHTING_LAT	Respondent's final alighting latitude	Actual Value
FINAL_ALIGHTING_LON	Respondent's final alighting longitude	Actual Value
WGHT_FCTR_NAME	Weight Factor Name created for data expansion (System, Route, Time of Day)	Actual Value
UNLINKED_WGHT_FCTR	Weight factor given to each record meant to represent number of boardings per day	Actual Value
TOTAL_TRANSFERS	Total number of previous and next transfers within systems surveyed	Actual Value
LINKED_WGHT_MULTPR	The multiplier to get the Linked Weight Factor	1/(Total Number of System Transfers + 1)
LINKED_WGHT_FCTR	Adjusted weight factor meant to represent the number of trips per day instead of number of boardings per day	Actual Value
