

**NWARPC 2045 MTP AMENDMENT #1 – EXHIBIT A  
PROPOSED ADDITIONS TO**

## **CHAPTER 9. TRANSPORTATION PROJECTS AND FUNDING SUMMARY OF FEDERAL AID PROGRAMS AND FUNDING**

### **CARBON REDUCTION PROGRAM (CRP)**

The Infrastructure Investment and Jobs Act (IIJA), which was signed into law on November 15, 2021, authorizes a new Carbon Reduction Program (CRP) codified at 23 United States Code (U.S.C.) 175 to reduce transportation emissions. The CRP provides funds that may be used on a wide range of projects designed to reduce transportation emissions, defined as carbon dioxide (CO<sub>2</sub>) emissions from on-road highway sources.

CRP funds are suballocated to Urbanized Areas with population over 200K. The Fayetteville-Springdale-Rogers, AR-MO Urbanized Area receives CRP funding as sub-allocated funding based on the relative share of the state’s population. Projects are selected through a competitive process and approved by the RPC/Policy Committee. CRP funds can be utilized for all eligible transportation projects at the discretion of the RPC/Policy Committee.

#### **CRP Estimated Funding (Federal, plus local match, 2 percent inflation/year):**

<b>Time Period (FFY)</b>	<b>Urbanized</b>	<b>Statewide</b>
2025 to 2030	\$ 9.2	\$ 48.9
2031 to 2035	\$ 8.5	\$ 45.5
2036 to 2045	\$ 19.9	\$ 105.7
<b>Total</b>	<b>\$ 37.6</b>	<b>\$ 200.1</b>

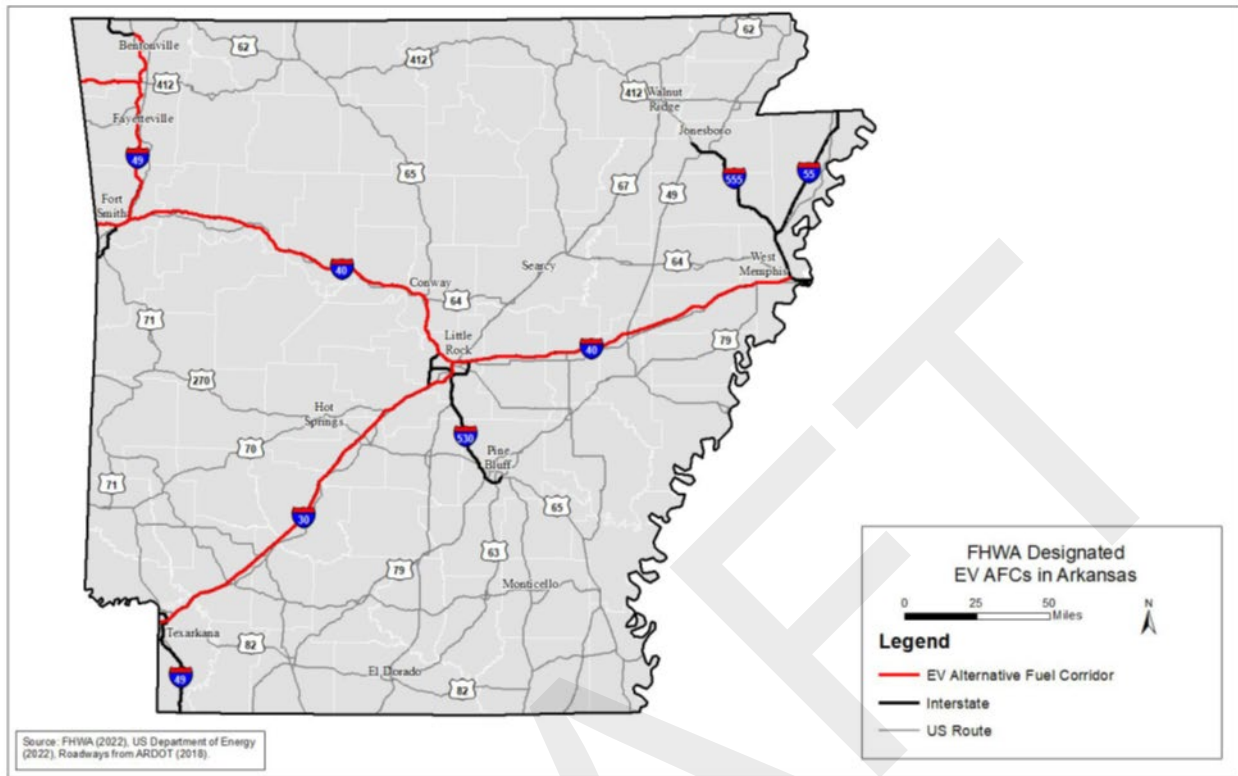

(Millions of dollars of estimated obligation limitation)

### **NATIONAL ELECTRIC VEHICLE INFRASTRUCTURE (NEVI) PROGRAMS**

The **NEVI Formula Program** is authorized under Paragraph (2) under the Highway Infrastructure Program heading in title VIII of division J of the Infrastructure Investment and Jobs Act (IIJA), which was signed into law on November 15, 2021. The purpose of the NEVI Formula Program is to provide funding to States to strategically deploy electric vehicle charging infrastructure and to establish an interconnected network to facilitate data collection, access, and reliability. A goal of the program is to build a national network of 500,000 EV charging stations along Alternative Fuel Corridors (AFC) by 2030.

#### **Alternative Fuel Corridor Designations**

The NWARPC nominated U.S. 412 as an EV Corridor-Pending on the federally designated Alternative Fuel Corridors (AFC) and was approved on July 5, 2022 by FHWA. Within the Metropolitan Planning Area Boundary, I-49 and U.S. 412 between the OK/AR border and the US-412/I-49 interchange in Springdale are designated as alternative fuel corridors.

To be effective, the EV charging infrastructure deployed under this program must provide a seamless customer experience for all users through a convenient, reliable, affordable, and equitable national EV charging network.

The IIJA also amends 23 U.S.C. 151 to establish two new discretionary grant programs to strategically deploy publicly accessible electric vehicle charging infrastructure, hydrogen fueling infrastructure, propane fueling infrastructure, and natural gas fueling infrastructure: the Discretionary Grant Program for Charging and Fueling Infrastructure (**Corridor Charging Grants**) and the Discretionary Grant Program for Charging and Fueling Infrastructure (**Community Charging Grants**).

**NEVI Formula Program Estimated Funding (Federal, plus local match, 2 percent inflation/year):**

Time Period (FFY)	NEVI
2025 to 2030	\$ 67.0
2031 to 2035	\$ 62.3
2036 to 2045	\$144.7
<b>Total</b>	<b>\$274.0</b>

(Millions of dollars of estimated obligation limitation)
